Small and Midsize Business Program - Did You Know?

If you have completed three projects in the program you may qualify for Partner Trade Ally status in the Small and Midsize Business Program and receive elevated rebates for your customers.

- Don't think of Small and Midsize businesses as your customers? You might be surprised! We have most recently served larger Chicago customers like The Ritz Carlton, The Wrigley Building, The Four Seasons, North Park University, Primrose Candy, and others through the Small and Midsize Business Program.
- Reach out to any Energy Advisor to learn if your customers qualify for Small and Midsize Business rebates.

Rebates on Rooftop Unit Tune-Ups

While out checking cooling systems, tune up the heating side as well and receive an incentive of \$0.30/MBH or \$0.40/MBH if you are a Partner Trade Ally. The program requires pre and post-combustion readings and the [checklist](#) filled out. Reach out to learn more.

Program Year 2022 Update

Program Teams are looking at when an application was first submitted to help keep projects moving.

Projects like steam traps and pipe insulation that have been in our pipeline for more than 90 days will be reviewed and evaluated to see what can be done to complete the project.

If a project isn't going to be completed in 2022, then those funds will be released and available to other customers.

Program Reminder

The Market Development Initiative Research (MDI) Trade Ally Survey will be coming to trade ally email inboxes soon! We highly encourage trade ally participation and feedback. All of the northern Illinois utility energy efficiency programs are working together to conduct research to learn how we can invest in workforce development within all of our communities.

Training Opportunities

Wireless Pneumatic Thermostats

August 31, 2022
10 a.m. - 11 a.m.

Join this webinar featuring a guest speaker to learn about the benefits of Wireless Pneumatic Thermostats.
